What's New in the Smart Wedding?

Weddingplanner for couples is a comprehensive and accessible application designed to provide a simple yet efficient method to add and manage all the necessary details for an ideal wedding. It lets you plan all the steps from the beginning till the very last day. Arrange and enter information about each important event It's wrapped in an intuitive and user-friendly layout divided into different tabs located on the left side of the panel. Among them, you can find events, budget, guest list, gifts, seating, a scheduler, and reports. When the program is run or the first time, you have to fill in a few personal information, such as the bride and groom full names, the wedding date, and the estimated budget, which may be changed anytime. In the overview tab, you can view the remaining time till the big ceremony, total budget, planned events (reception, rehearsal, bridal shower), along with the ongoing tasks, upcoming, scheduled and transportation payments. To plan a new meeting, you need to input the name, date, time, short description, location, contact phone and the menu you wish to be served. View and manage active chores and plan your finances wisely Smart Wedding comes with predefined tasks that might be compatible with what you need to accomplish. However, there is no option to enter new ones, which narrows the ability to customize them. Some may not apply to every individual. Regarding the budget, the provided categories are plenty and detailed. All you have to do is input the value and it's instantly calculated. The currency is detected based on the system's default country. Making appointments is a simple task, you just have to write the subject, location, date, and vendor. Other useful features that you can handle For providers, on the other hand, more details are required, such as name, phone numbers, email, address and website if it's the case. Other worth mentioning functions you can access and customize are the guest and table lists, invitations, presents, and reports. Plus, the records can be exported to the specific tool's format (SW.DATABASE). The bottom line To sum it up, Smart Wedding is a sophisticated and reliable program that comes in handy especially for the bride and groom, but not only, to add, organize and handle all the essential steps towards a beautiful wedding.
